1. INTRODUCTIONS - CMU School of Computer Science

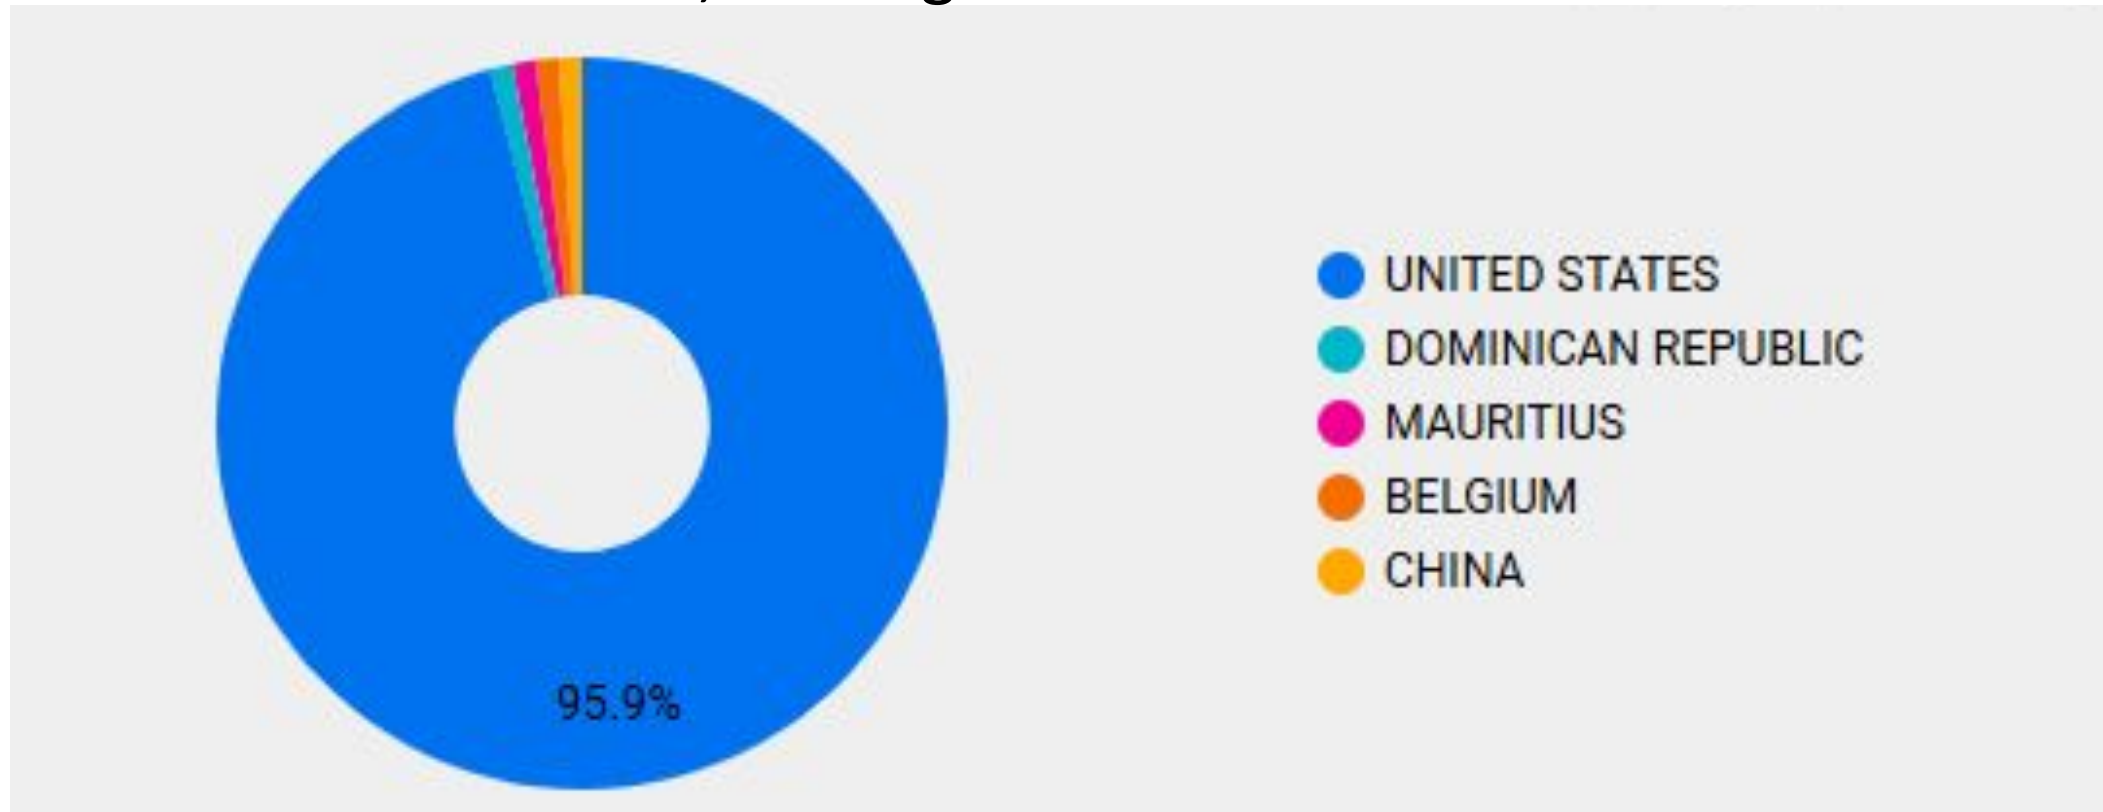

- **Carnegie Mellon University (CMU)**
 - Founded in 1900 by Andrew Carnegie
 - Location: Pittsburgh, Pennsylvania
 - Known for: Computer Science and Engineering programs
- **School of Computer Science**
 - #1 Computer Science (Overall)
 - #1 Artificial Intelligence
 - #1 Programming Languages
 - #2 Systems
 - #2 Theory

Source: US News & World Report 2024
- **#1 Graduate Programs – USNWR 2022**
 - Computer Science, Artificial Intelligence
 - Computer Science, Programming Languages
- **#2 Undergraduate Programs – USNWR 2021**
 - Computer Science, Mobile/Web Applications
 - Computer Science, Game Theory
 - Computer Science, Data Analytics/Science
- **#2 Graduate Programs – USNWR 2022**
 - Computer Science (Overall)
 - Computer Science, Systems

1. INTRODUCTIONS - FACULTY

Amir Barati Farimani

Russell V. Trader Associate Professor of Mechanical
Engineering

1. INTRODUCTIONS - LEARNING FACILITATOR

Peter Pak

Peter Pak, a PhD candidate in Mechanical Engineering at Carnegie Mellon University specializing in additive manufacturing and machine learning, has a strong passion for solving complex engineering problems, rooted in hands-on experience from an early age. His expertise in interdisciplinary work is a testimony to a collaborative mindset and enthusiasm. He is currently advancing research in agentic additive manufacturing and preparing to defend a thesis focused on continual learning–driven process optimization. He has worked with Dr. Amir Barati Farimani for over 4 years and together they have published several works regarding agentic systems and large language models in his lab.

1. INTRODUCTIONS - LEARNING FACILITATOR

Jesse Barkley

Jesse Barkley is an AI engineer and researcher with a background in mechanical engineering, computer vision, and robotics. He holds a Master of Science in AI Engineering from Carnegie Mellon University and a Bachelor of Science in Mechanical Engineering from Arkansas State University. At CMU, Jesse was as an Artificial Intelligence Fellow. He designed custom AI tutoring tools for graduate engineering courses, built agentic grading assistants using RAG pipelines, and presented to various faculty and alumni on trustworthy deployment of LLMs in education.

His research experience includes evaluating vision-language models for real-time assessment tasks at the U.S. Army Research Laboratory, where he published works benchmarking open-source VLMs for edge deployment. Jesse's technical expertise spans Python, PyTorch, computer vision, robotics (ROS2), and agentic AI frameworks.

He brings a combination of deep technical knowledge and hands-on instructional experience, with a focus on making complex AI concepts accessible and practical for learners.

1. INTRODUCTIONS - LEARNING FACILITATOR

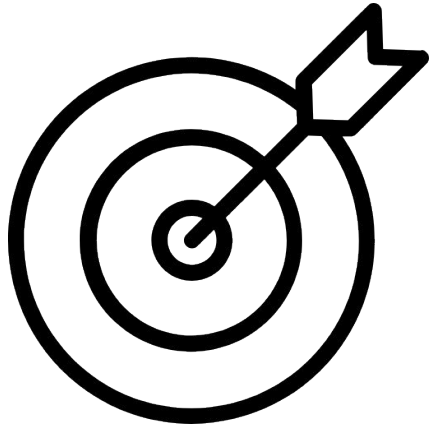

Rumi Loghmani

Rumi Loghmani is an AI and robotics researcher specializing in agentic AI systems, multimodal learning, and intelligent automation. Currently pursuing a Master's in Mechanical Engineering with AI Research at Carnegie Mellon University, he develops diffusion-policy and visuo-tactile learning systems for robotic manipulation and autonomous decision-making.

His experience spans generative AI, full-stack AI product development, and scalable intelligent systems through roles at TikTok, Jadu Studios, and CMU research labs. Rumi combines strong technical depth in machine learning, robotics, and software engineering with a product-oriented mindset focused on building adaptive, human-centered AI systems.

2. LEARNING JOURNEY – LEARNING OBJECTIVES

- Build an autonomous agent that incorporates memory, tools, and structured reasoning.
- Implement retrieval techniques using embeddings and vector databases to enhance agent outputs.
- Design multi-agent workflows with defined roles and coordination logic.
- Integrate external APIs and tools to extend agent capabilities.
- Apply evaluation and safety practices to improve agent reliability and performance.
- Develop an agentic AI autonomous system that addresses a genuine problem.

2. LEARNING JOURNEY – COURSE OUTLINE

Module	Module Release Date	Module Due Date
Module 0: Program Orientation	May 7, 2026	May 10, 2026
Module 1: Foundation of Agentic AI & LLM Capabilities	May 11, 2026	May 18, 2026
Module 2: Agent Architecture: Memory, Tools and Reasoning Loops	May 18, 2026	May 25, 2026
Module 3: RAG Agents and Vector Databases	May 25, 2026	June 1, 2026
Module 4: Tree-of-Thought Reasoning and Multi-Agent Concepts (Part 1)	June 1, 2026	June 8, 2026
Module 5: Multi-Agent Workflows with CrewAI and LangGraph (Part 2)	June 8, 2026	June 15, 2026
Module 6: Evaluation, Guardrails, Logging and Observability	June 15, 2026	June 22, 2026
Module 7: Capstone Project	June 22, 2026	June 29, 2026

2. LEARNING JOURNEY – CAPSTONE PROJECT

- **Goal:** develop an agentic AI autonomous system that addresses a genuine problem
- **For the Capstone Project, you will select one of the following project types:**

(1) Personal Assistant

Build an agent that supports everyday productivity tasks such as drafting emails, coordinating travel, managing information, or assisting with routine workflows. This option is best for learners who are new to building agents and seeking a more accessible starting point.

(2) Forecaster

Build an agent that gathers and analyzes dynamic information from sources such as news, markets, or weather to support predictions, monitoring, or informed responses. This option is ideal for learners who are interested in knowledge collection and trend-based decision support.

(3) Research Assistant

Build an agent that works in a research-focused environment by navigating large information sources and using tools to generate or analyze new data. This is the most advanced option and is best suited for learners who want to take on a more complex agent design challenge.

- Every week, you will submit a Capstone checkpoint assignment that will guide you through the development of your project
- **Decision on the project type needs to be done before May 18**, which is when first Capstone Checkpoint is due

2. LEARNING JOURNEY – COMPLETION REQUIREMENTS

<i>Categories</i>	<i>Description / Evaluation</i>	<i>Weight</i>
Capstone Checkpoints	Graded Capstone checkpoints within each module	55%
Final Capstone Submission	Final Capstone project report and presentation	45%

Required Activities:

Assignment Name	Points	Release Date	Due Date
Required Capstone Checkpoint 1.1: Capstone Project Scoping and Initial Agent Design	1	May 11, 2026	May 18, 2026
Required Capstone Checkpoint 2.1: Capstone Agent Design Refinement	1	May 18, 2026	May 25, 2026
Required Capstone Checkpoint 3.1: RAG and Retrieval Design Integration	1	May 25, 2026	June 1, 2026
Required Capstone Checkpoint 4.1: Tree-of-Thought Integration Plan	1	June 1, 2026	June 8, 2026
Required Capstone Checkpoint 5.1: Multi-Agent Architecture and Coordination Plan	1	June 8, 2026	June 15, 2026
Required Capstone Checkpoint 6.1: Safety Guardrails and Human Intervention Plan	1	June 15, 2026	June 22, 2026
Required Capstone Assignment 7.1: Final Capstone Project Report and Presentation	1	June 22, 2026	June 29, 2026

On top of required Activities, the program also has multiple optional activities (quizzes, discussions, etc.) that will enable you check the understanding of the concepts learnt throughout the modules

2. LEARNING JOURNEY – LIVE SESSIONS OVERVIEW

(1) Live Sessions with Dr. Amir Farimani

- One per week
- Every Wednesday 11:00 AM EST
- 90 minutes

(2) Virtual Labs with Peter Pak

- Two per week
- Every Thursday and Friday at 11:00 AM EST
- 90 minutes per session

(3) Office Hours with Jesse Barkley

- One per week
- Determine schedule through [form](#)
- 60 minutes

- All Live Sessions will be recorded and posted on the learning platform within 24 hours
- Use <https://www.worldtimebuddy.com/> to convert time to your timezone

2. LEARNING JOURNEY – LIVE SESSIONS SCHEDULE

(1) Live Sessions with
Dr. Amir Farimani

Live Session	Presenter	Session Date	Time UTC
Module 1: Foundations of Agentic AI & LLM Capabilities	Dr. Amir Farimani	5/13/2026	3:00 PM
Module 2: Agent Architecture: Memory, Tools, and Reasoning Loops	Dr. Amir Farimani	5/20/2026	3:00 PM
Module 3: RAG Agents & Vector Databases	Dr. Amir Farimani	5/27/2026	3:00 PM
Module 4: Tree-of-Thought Reasoning & Multi-Agent Concepts (Part 1)	Dr. Amir Farimani	6/3/2026	3:00 PM
Module 5: Multi-Agent Workflows with CrewAI & LangGraph (Part 2)	Dr. Amir Farimani	6/10/2026	3:00 PM
Module 6: Evaluation, Guardrails, Logging & Observability	Dr. Amir Farimani	6/17/2026	3:00 PM
Module 7: Capstone Project	Dr. Amir Farimani	6/26/2026	3:00 PM

- Time on Learning Platform is UTC
- Use <https://www.worldtimebuddy.com/> to convert UTC time to your timezone

2. LEARNING JOURNEY – LIVE SESSIONS SCHEDULE

(2) Virtual Labs with Peter Pak

Live Session	Presenter	Session Date	Time UTC
Live Guided Virtual Lab 1.1: LLM Comparisons and Benchmarking	Peter Pak	5/14/2026	3:00 PM
Live Guided Virtual Lab 1.2: Why Agents Need Tools	Peter Pak	5/15/2026	3:00 PM
Live Guided Virtual Lab 2.1: Building a ReAct Agent/Capstone Support	Peter Pak	5/21/2026	3:00 PM
Live Guided Virtual Lab 2.2: Tool Calling in Agents/Capstone Support	Peter Pak	5/22/2026	3:00 PM
Live Guided Virtual Lab 3.1: Domain Specific GPT with RAG and Open Source LLMs/Open Office/Capstone Support	Peter Pak	5/28/2026	3:00 PM
Live Guided Virtual Lab 3.2: Enhancing RAG Quality with Maximal Marginal Relevance (MMR)/Capstone Support	Peter Pak	5/29/2026	3:00 PM
Live Guided Virtual Lab 4.1: Tree of Thought Agent Construction/Capstone Support	Peter Pak	6/4/2026	3:00 PM
Live Guided Virtual Lab 4.2: Tree of Thought Agent Benchmarking/Capstone Support	Peter Pak	6/5/2026	3:00 PM

2. LEARNING JOURNEY – LIVE SESSIONS SCHEDULE

(2) Virtual Labs with
Peter Pak

Live Session	Presenter	Session Date	Time UTC
Live Guided Virtual Lab 5.1: Part 1 Determining Agent Count and Communication/Capstone Support	Peter Pak	6/11/2026	3:00 PM
Live Guided Virtual Lab 5.2: Part 2 Refining Coordination Workflow Control and Benchmarking/Capstone Support	Peter Pak	6/12/2026	3:00 PM
Live Guided Virtual Lab 6.1- Guardrailing Hallucinations and Overconfidence in Agent Outputs/Capstone Support	Peter Pak	6/18/2026	3:00 PM
Live Guided Virtual Lab 6.2: Logging Observability and Human Intervention in Agent Systems/Capstone Support	Peter Pak	6/19/2026	3:00 PM
Required Final Capstone Presentation: Capstone Project Presentation	Peter Pak	6/22/2026	3:00 PM
Live Guided Virtual Lab 7.1 Integration Lab/Capstone Support	Peter Pak	6/24/2026	3:00 PM
Live Guided Virtual Lab 7.2 Evaluation and Readiness Lab/Capstone Support	Peter Pak	6/25/2026	3:00 PM

2. LEARNING JOURNEY – WHAT YOUR WEEK WILL LOOK LIKE

Monday	● Module Releases ● Go through pre-read, self-study quizzes and discussions
Tuesday	● Go through pre-read, self-study quizzes and discussions
Wednesday	● Prof. Amir's live session, 90 mins
Thursday	● Virtual Lab 1 with Peter Pak, 90 mins
Friday	● Virtual Lab 2 with Peter Pak, 90 mins
Saturday/Sunday	● Office Hour with Jesse , 60 mins

3. TOOLS

Jupyter Notebook, will be used during Virtual Labs

Google Collab / VSCode

- Integrated Development Environment to run Jupyter notebooks in with appropriate Python environments.

Open Router,

- To support hands-on testing, you may use Open Router to access freely available LLM tokens and experiment with different models through a single interface. To learn more, please [visit the Open Router website](#)
- This gives you a practical way to prototype your agent, test core workflows, and make informed decisions about which models best suit your design.

LLM

- The program does not include paid LLM tokens or credits. You are expected to design your capstone and test it using freely available model access.
- After the program, if you choose to host, run, or scale your agentic AI system in a real-world setting, you may select and purchase access to the LLMs that best fit your use case, performance needs, and budget.

3. LEARNING PLATFORM DEMO - SET UP YOUR PROFILE

The screenshot shows the 'Account & More' page in the Canvas LMS. The left sidebar contains the following menu items: Home, Course Dashboard, Modules, Live Sessions, My Bookmarks, My Grades, Refer and Earn, People, Classmates, Announcements (with a red badge showing '2'), Support, Notification Settings, **Account & More** (highlighted with a blue bar), and My Programs. The main content area is titled 'Account & More' and includes a 'Logout' button and several tiles: 'My Profile', 'Calendar', 'Notification Settings', 'Inbox', and 'Settings'. The 'Settings' tile is highlighted with a red arrow labeled '2. Settings'. To the right of the 'Settings' tile, a 'Settings' form is visible with fields for 'Full Name', 'Display Name', 'Sortable Name', 'Language' (set to 'System Default (English (US))'), and 'Time Zone' (set to 'Eastern Time (US & Canada)'). A red arrow labeled '4. Select your timezone' points to the 'Time Zone' field. To the right of the 'Settings' form, a red arrow labeled '3. Edit Settings' points to an 'Edit Settings' button. At the bottom left, a red arrow labeled '1. Account & More' points to the 'Account & More' menu item in the sidebar.

3. LEARNING PLATFORM DEMO - EMERITUS AI TUTOR

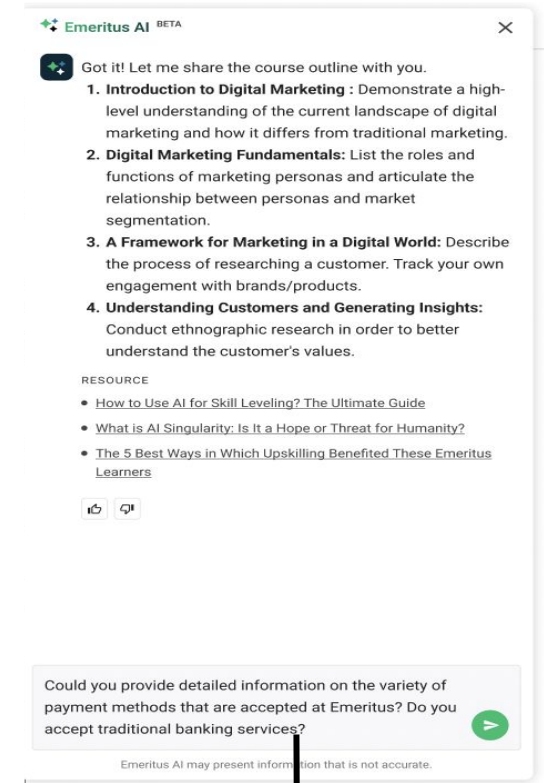

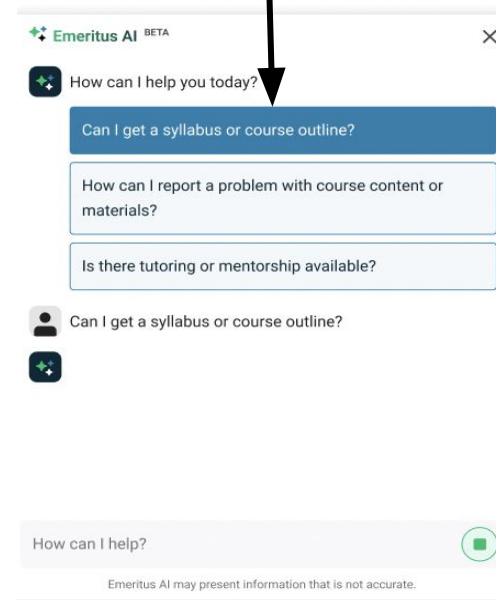

Emeritus AI Tutor is designed to assist you throughout your learning journey

- your on-demand resource for instant answers and personalized support
- Think of it as a *24/7 tutor* that knows your entire curriculum
- It's not designed to evaluate assignments, confirm final answers, or replace feedback from your graders

Emeritus AI Tutor

It will suggest questions based on your current learning page

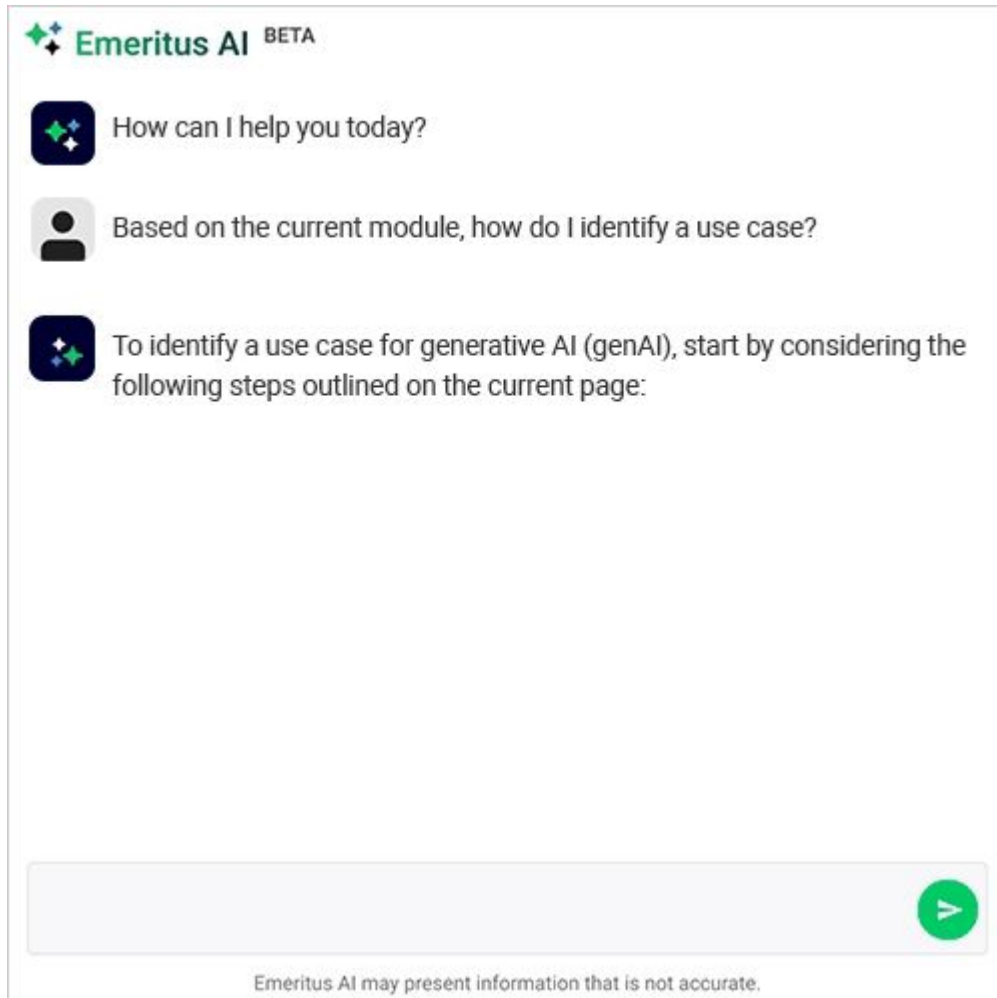

You can also type your own questions

Carnegie Mellon University
School of Computer Science
Executive Education

3. LEARNING PLATFORM DEMO - EMERITUS AI TUTOR

Your AI Tutor is already open on the right. **Try it now!**

Tips:

- Share what you already understand and where you're stuck
- Concept unclear during a video? Ask immediately while you're learning
- Stuck on an assignment? Get unstuck without waiting for live sessions
- Don't ask the AI Tutor to complete assignments for you or replace program engagement

Sample questions:

- Can you explain the core idea behind Video 2.3 using a simple example?
- How does this apply to [my industry]?

3. LEARNING PLATFORM DEMO - EMERITUS AI TUTOR

Here are some ideas of what you can ask the AI Tutor Bot:

Refresh Concepts or Dive Deeper

- *"What is pre-activation?"*
- *"Explain logistic regression basics."*
- *"How does logistic regression training work?"*
- *"What is the purpose of the activation function in neural networks?"*

Ask When You are Stuck: AI tutor is your thinking partner

- *"Why is my code only printing the last graph in a for loop?"*
- *"What should I include in my introduction post?"*
- *"I still don't understand this. Explain this to me like I'm a 10-year-old"*
- *"Why is learning this important?"*

Ask about Your Learning Journey

- *"What's happening tomorrow?"*
- *"What can I expect from the next module on Deep Learning?"*
- *"When is my next assignment due?"*
- *"What is a self-study discussion in a section?"*

3. LEARNING PLATFORM DEMO - EMERITUS AI TUTOR

AI TUTOR FAQ

- **How can I provide feedback?**

Like or dislike each response. Your feedback helps us continually improve AI Tutor for you and future learners.

- **Does AI Tutor have limitations?**

Yes. It works best with text-based questions about program content. It cannot analyze images, access external tools, or accept file uploads yet.

- **What Sets It Apart?**

Unlike generic AI tools, your responses here are grounded in your faculty's teaching methods and program materials.

3. LEARNING PLATFORM DEMO - SYNC YOUR CALENDAR

Access the Program Calendar from the navigation menu and sync it with your personal calendar:

The screenshot displays the Student Center calendar interface. A modal window titled "Calendar Feed" is open, providing instructions to copy a link and paste it into a calendar app. The link is https://student.emeritus.org/feeds/calendars/user_J1y8L6o. Below the link is a "click here to view the feed" button. The modal also features a close button (X) in the top right corner. In the background, a calendar grid for May 2020 is visible, showing office hours for Rob Manriquez, Jessica Cervi, and Adam Baybutt. On the right side of the interface, a sidebar contains a "CALENDARS" section with a list of calendars: "Test Student" (blue square) and "Python for Managers" (green square). Below this list, a "Calendar Feed" link is circled in red, with a red line connecting it to the modal window.

Calendar Feed

Copy the link below and paste it into any calendar app that takes iCal feeds (Google Calendar, iCal, Outlook, etc.)

https://student.emeritus.org/feeds/calendars/user_J1y8L6o

[click here to view the feed](#)

CALENDARS

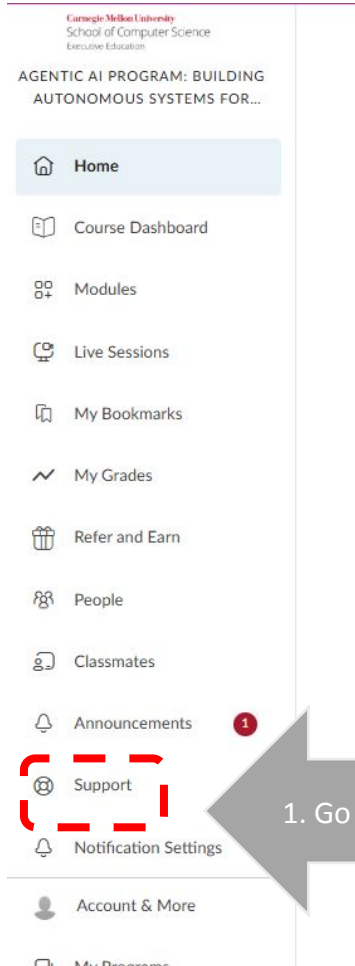

- Test Student
- Python for Managers

Calendar Feed

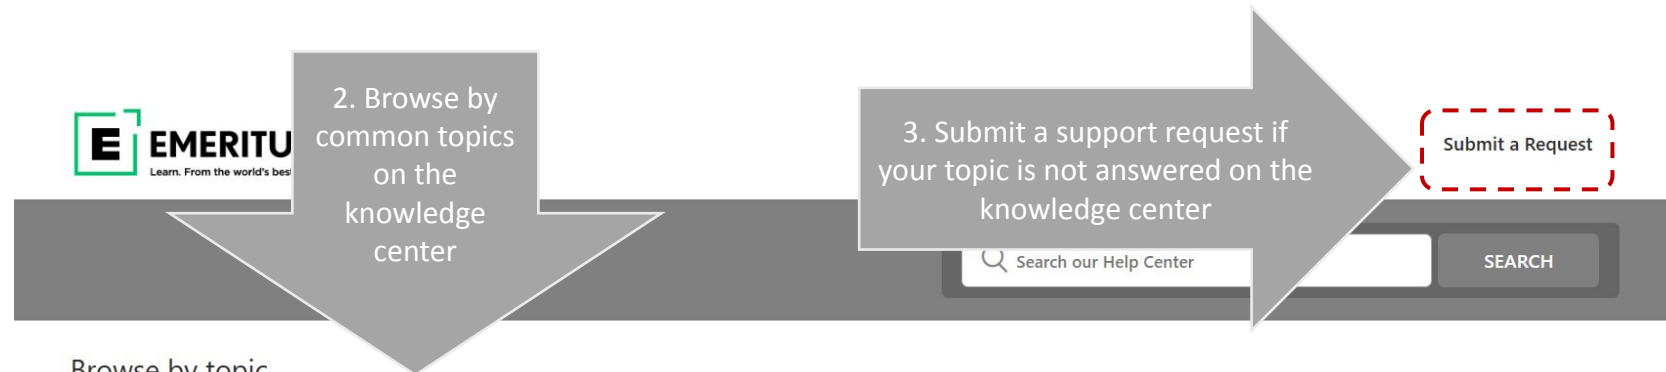

3. LEARNING PLATFORM DEMO - PROGRAM SUPPORT

If you have a question, what do you do?

Find Answers to Problems on the Knowledge Center and/or submit a support request

1. Go to Support Tab

Browse by topic

- About Emeritus
- Course Access and Technical Support
- Withdrawals and Deferrals
- Assignments (Submissions, Grading, Extensions)
- Course Specific
- Groups
- Application and Enrollment
- Canvas
- Completion Requirements, Badges and Certificates
- Live Sessions (Webinars and Office Hours)
- Student Simulations
- Videos

If you cannot find an answer to your question, click [here](#) to submit a request.

3. LEARNING PLATFORM DEMO - PROGRAM SUPPORT

How do you submit a support request?

Submit a request

The form is titled 'Submit a request' and contains the following fields and steps:

- 1. Fill in required fields**: Points to the 'Your email address *' field.
- 2. Select a topic:**: Points to the 'Select one which best describes your query *' dropdown menu. The options are:
 - (1) Content Related Issues
 - (2) Technical Issues
 - (3) Enrollment issues
- 3. Write a brief description of your question**: Points to the 'Description *' text area. Below the text area, it says 'Please enter the details of your request. A member of our support team will respond to your request within 24 hours.' The description area contains the following text:
 - Understanding the course content and the assignment requirements
 - Help with submissions, extensions, accessing materials and everything else
 - Enrollment, payment, certificates
- 3a. Attach files (if needed)**: Points to the 'Attachments' section, which includes a file upload button labeled 'Add file or drop'.
- 4. Submit**: Points to the 'Submit' button at the bottom of the form.

Below the 'Course ID *' field, there is a note: 'Please enter your course ID from your course URL. Example - <https://student.emeritus.org/courses/001> wherein 001 would be your course ID. It's a 3 to 4 digits number.'

Support tickets will:

- Get your question to the right person
- Ensure a quick response
- Allow you to track whether you've received a response
- Allows Emeritus to track and ensure every ticket receives an answer

**Peter Pak -
Learning Facilitator**

- Virtual Lab related questions on the Live session on Thursdays and Fridays

**Jesse Barkley, Rumi Loghmani -
Learning Facilitator**

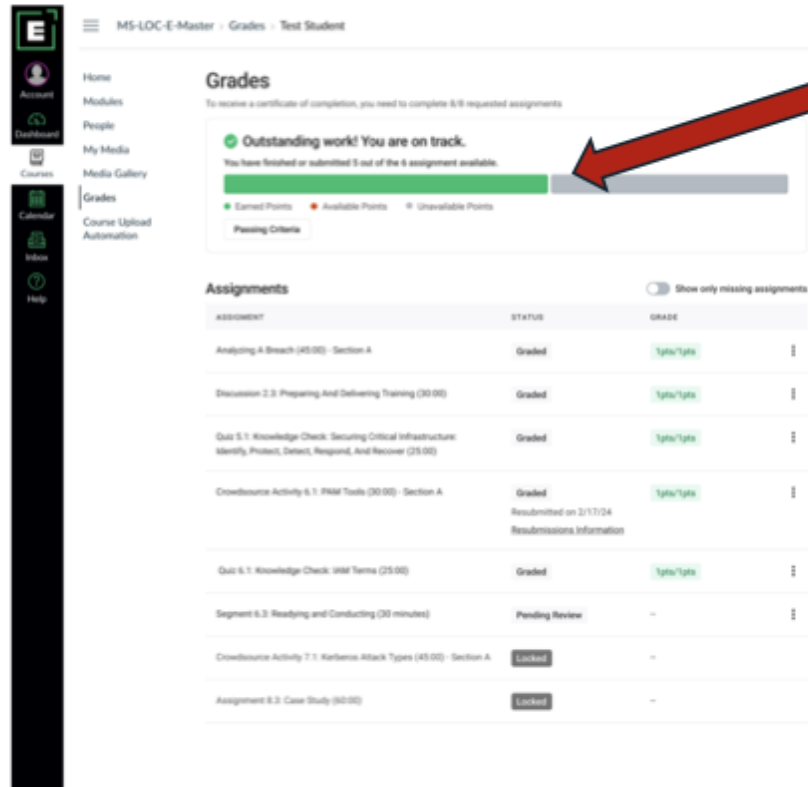

- Weekend Live session - Office Hours to resolve issues
- Assignment related queries
- Grading related queries

**Hitesh Khubchandani -
Learning Support Specialist**

- Content related queries
- Response on tickets

3. LEARNING PLATFORM DEMO - TRACK YOUR PROGRESS

Gradebook :

You will see a status of your progress at the top of your Grades.

On-Track – you are meeting the requirements of the program.

Falling Behind – if you are unable to stay ‘on track’– you will be able to see what assignments are pending directly.

*Extensions are available.

Different assignment submission statuses:

- 1.Locked (Module/assignment not yet available to learners)
- 2.Pending Review
- 3.Graded
- 4.Upcoming Due
- 5.Missing

3. LEARNING PLATFORM DEMO - TRACK YOUR PROGRESS

Gradebook – Completion Status:

At the end of your program – you will be notified if you have passed the course as soon as your completion has been processed.

- If you have not yet met the requirements – you can quickly analyze what assignments are missing in order to complete your program.
 - *Request an extension! Support can be provided to help you successfully complete your program.*

Passed!

REFER A FRIEND

Level Up Together

Enhance your learning experience by studying alongside your peers.

https://execonline.cs.cmu.edu/agnostic-ai-program?v=v2&program_sfid=01tRC00i

Here's how it works:

- 1 Invite your friends: Share your personal link.
- 2 Benefit for them: Each friend receives US\$250 off their program fee.
- 3 Benefit for you: Receive a US\$250 refund for each friend joining your cohort.

FAQs

Your friend will receive **10% off** their program fee. Once registered, you will receive a **10% discount** to your current program or, in enrolled later, you will receive a 10% credit to your next eligible program!

Copy link and share with your friends - colleagues!

3. LEARNING PLATFORM DEMO - MOBILE ACCESS

Mobile Access

To access the program on your mobile device, download the Emeritus Classroom App by selecting one of the icons below. Enter your registered email address and password to log in. Enjoy your learning experience!

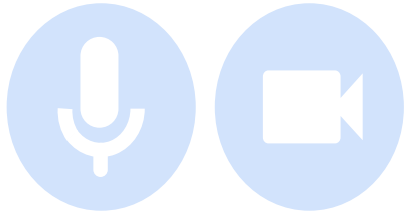

[Android](#) 

[iOS](#) 

You can access the program through your mobile app, downloading **Emeritus Classroom App**

4. SOME RECOMMENDATIONS

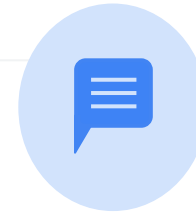

Make the most of Live Sessions

Attend Office Hours with Learning Facilitators, as well as faculty webinars, to interact live with faculty, LFs, and fellow participants.

Practice, practice, practice

Complete all the program activities to have a full understanding of the machine learning components and algorithms.

Seek for Support

Participate in Q&A Discussion Boards on Canvas: ask questions if something is not clear and collaborate with your other learners.

Let us know your insights

Complete Weekly Feedback Surveys, let us know what you enjoyed and what you would improve. They will help us get better!

QUESTIONS?

Enjoy the learning journey!
